Jagged array Example
Console application

Source Code:-

Module Module1
    Sub Main()
        Dim arr()() As Integer = New Integer(2)() {}
        Dim a(2) As Integer
        a(0) = 10
        a(1) = 100
        a(2) = 1000
        arr(0) = a
        Dim a1(0) As Integer
        arr(1) = a1
        Dim a2() As Integer = New Integer() {1, 2, 3, 4}
        arr(2) = a2
        For i As Integer = 0 To arr.Length - 1
            Dim j As Integer() = arr(i)
            For n As Integer = 0 To j.Length - 1
                Console.Write(j(n))
                Console.Write(" ")
            Next
            Console.WriteLine()
        Next
        Console.ReadLine()
    End Sub
End Module

Output:-

Jagged array Example Console application
